Powder PCE

Powder PCE is an innovative new generation polycarboxylate ether based slump retaining aid with super retention technology.

polycarboxylate superplasticizer is a new type concrete admixture for green concrete.

It can be used in high strength concrete, high performance concrete, mass concrete and high quality flow plastic concrete.

Performance

- (1) A kind of anionic / non-ionic liquid admixture, low-chloride, low-alkali, non-toxic, free effect on ecological environment.
- (2) Powder PCE has excellent water-reducing ability. can greatly reduce slump loss.
- (3) Powder PCE can significantly reduce 25% ~40% mixing water in concrete.
- (4) High strength enhancing ability. Better performance when used together mineral admixture.
- (5) No bleeding, anti-segregation, easy to pump and transport.
